SOURCE: [REDACTED]

1. During 1953 there appeared to be a serious shortage of all types of drugs and medical supplies in Shanghai.¹ Most drugs were available only on prescription by a physician. Because of a shortage of serum, smallpox vaccinations appeared to have been discontinued for the general public during the latter part of 1953.²
2. Hospitals and other medical facilities in Shanghai were adequate for treatment of civilians in 1953 but were hampered by the shortage of medical supplies.

25X1A [REDACTED] Comments

1. Other available information indicates that there was an adequate supply of drugs in Shanghai during 1953. [REDACTED] 25X1A
[REDACTED] 25X1A
in July 1953 there was no shortage of medicine in Shanghai, although prices were very high. Penicillin and streptomycin were freely and amply available in pharmacies in Shanghai in November 1953, [REDACTED] 25X1A
According to information from another agency, obtained from a doctor who left Shanghai in early July 1953, drugs and anti-biotics were in general readily available in Shanghai, although some could be obtained only with a doctor's prescription.
2. In the summer of 1953 smallpox was among the sera and vaccines in abundant supply in Communist China, [REDACTED] 25X1A
